

SOCCERVERSE

GETTING STARTED

XAYA

Getting Started

The following are required to play Socccerverse:

1. The MetaMask wallet (a browser based cryptocurrency wallet)
2. Your MetaMask wallet configured for the Polygon blockchain
3. Some MATIC and WCHI (aka CHI) cryptocurrency

The procedures for desktop browser clients and mobile device clients are similar with only a few minor differences. For the sake of simplicity and clarity, this guide will go over what you need to do on desktops and mobile devices separately.

NOTE: If you are having trouble following this guide, please join our [Discord server](#) for help and support.

Desktop Setup

You can use almost any web browser that you wish as long as it supports the MetaMask wallet browser extension.

Install & Set Up MetaMask

If you already have MetaMask installed, you can skip this step and go to the ["Get Some Matic"](#) section.

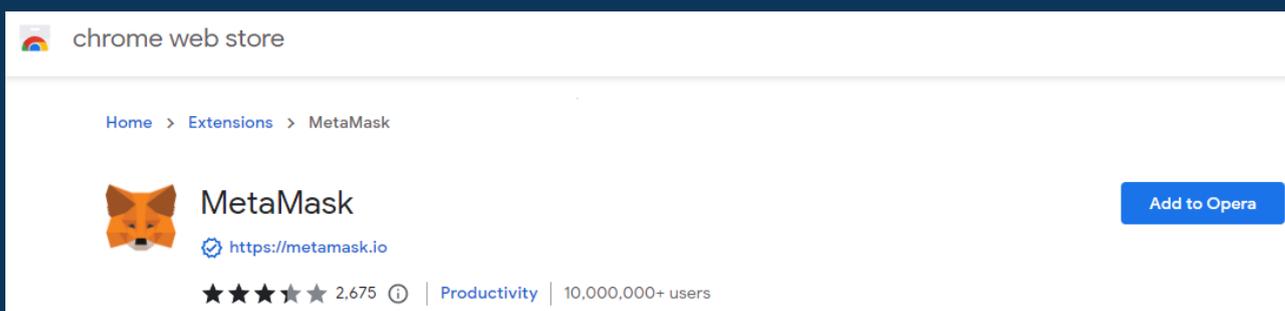

The official MetaMask website is here:

<https://metamask.io>

Simply visit the website, click the DOWNLOAD button, and install it.

If you have not used MetaMask before, then you should select the option to create a new wallet. If you have used it before, you can import your old wallet.

Most browsers are supported, including Google Chrome, Safari, Edge, Opera, Vivaldi, and more.

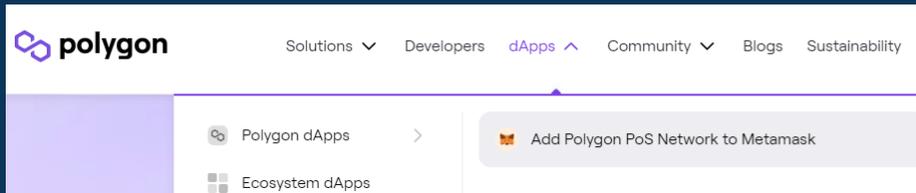

It's very important that you back up your seed phrase when the installer asks. **DO NOT FORGET TO DO THIS.**

Add Polygon to MetaMask

Once your MetaMask wallet is set up, you must then switch it from Ethereum to Polygon.

To add Polygon to MetaMask:

1. Visit <https://polygon.technology>
2. Click the dApps link in the top navigation
3. Click the Add Polygon PoS Network to MetaMask link

4. Follow the instructions (you may receive a warning that you must approve)

Congratulations! Your wallet is set up. Now you need some MATIC and WCHI tokens.

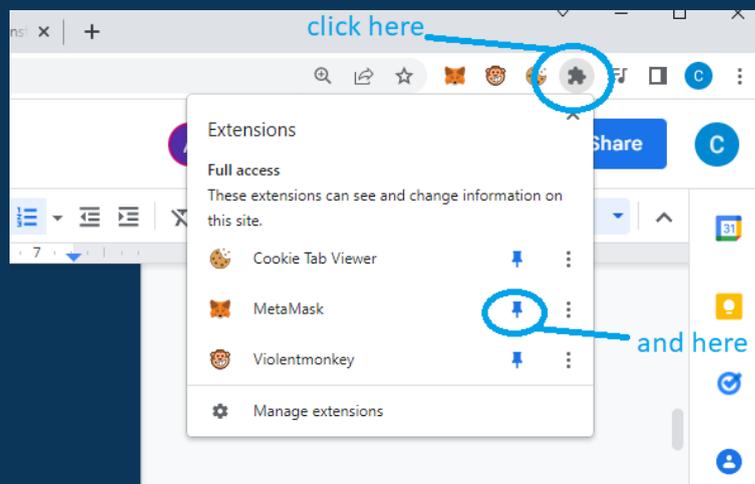

Get Some MATIC

MATIC is the cryptocurrency of the Polygon blockchain. It is required for performing actions in Soccerverse. This is to prevent spam on the network and is generally extremely small in actual \$ costs.

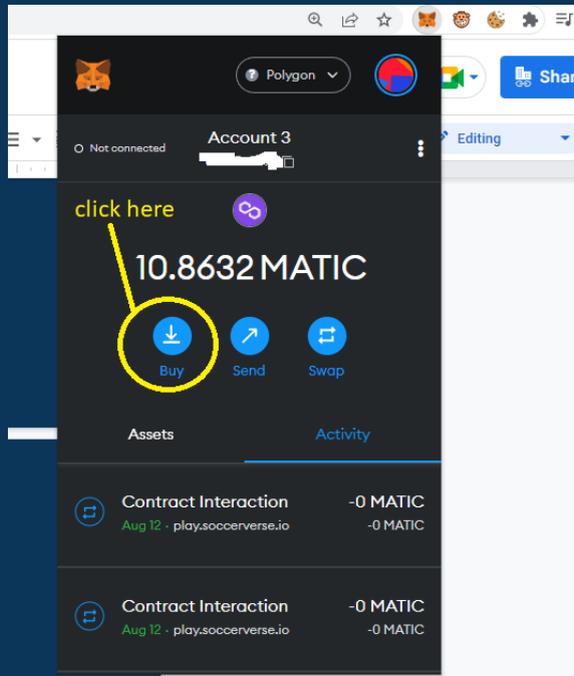

You can purchase MATIC on various exchanges, however, the easiest and quickest way is within the MetaMask wallet itself. Once you purchase MATIC you can then easily purchase WCHI using the MATIC.

To purchase MATIC in MetaMask:

1. Open MetaMask by clicking on the browser extension (you may need to click this button to pin the extension in your browser so that you can see it)

2. Click the Buy button

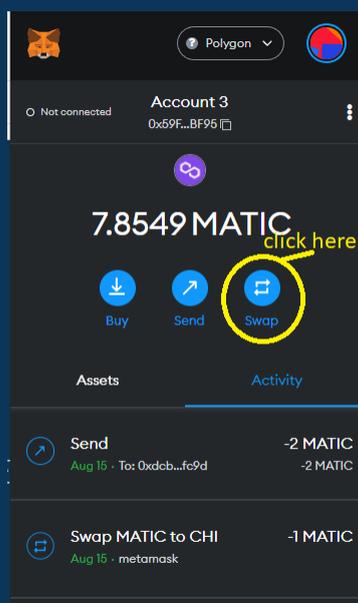

3. Purchase some MATIC by following the instructions on the screen. Later you will convert some of this to WCHI, so buy as much as you think you want to spend in Soccerverse. Once completed, the MATIC will appear in your wallet. The minimum you can purchase by this method ranges from around \$5 to about \$20 or about £16. This should be more than enough to get started in Soccerverse.

Get Some WCHI (aka CHI)

WCHI (or just CHI), is the cryptocurrency of Xaya. Xaya is the underlying technology that Soccerverse runs on. WCHI is used to create accounts and for in-game purchases.

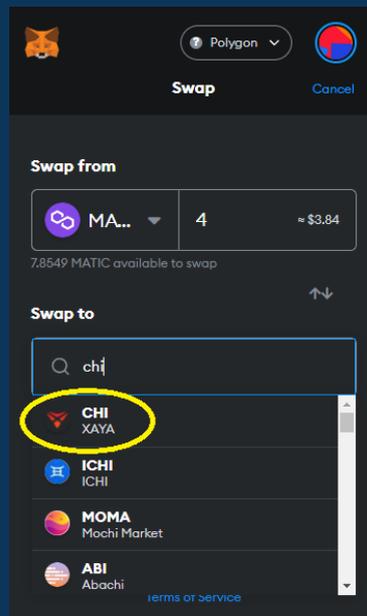

1. To get some WCHI, click the Swap button in MetaMask

2. Enter the amount of MATIC you want to convert to WCHI.

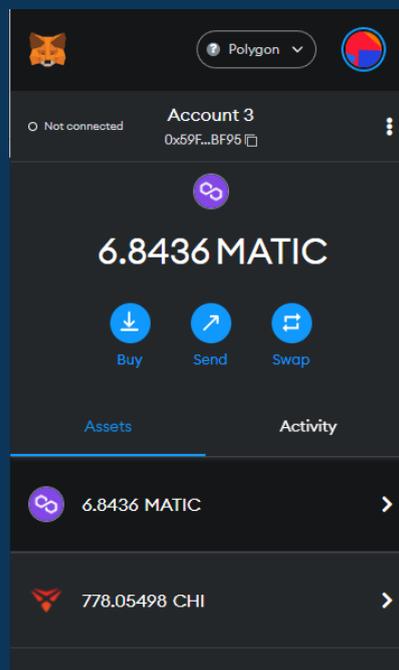

3. In the Swap to field, type CHI and select CHI (XAYA)

4. Click Continue if it pops up a message
5. Click Review Swap
6. Click Swap

You should now have everything you need to start playing. You will see your MATIC and your WCHI (as CHI) in the assets section of your MetaMask wallet

You can now create an account and play Soccerverse on the Soccerverse website.

For help or questions, [visit our Discord server and ask in an appropriate channel.](#)

Mobile Setup

Setting up on a mobile device is similar to the desktop method above. The main difference is that MetaMask is both a wallet app and a browser.

The following guide uses Android. For our purposes playing Socccerverse, the only significant difference between Android and iOS is the app store that you use.

Get MetaMask

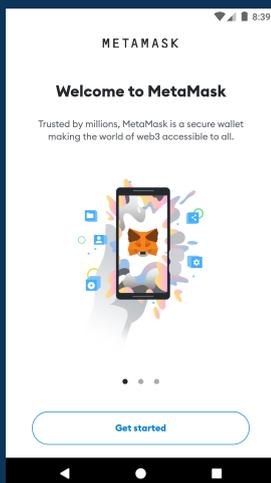

Open up the Google Play Store and search for “MetaMask” then click to visit its page. You can also click the following link to be taken there.

<https://play.google.com/store/apps/details?id=io.metamask>

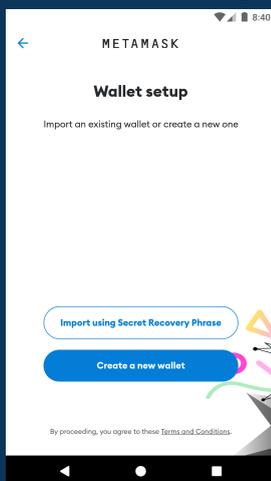

Set Up Your MetaMask

Once installed, you must properly configure MetaMask to use it. The following will guide you through the process step-by-step to create a new wallet.

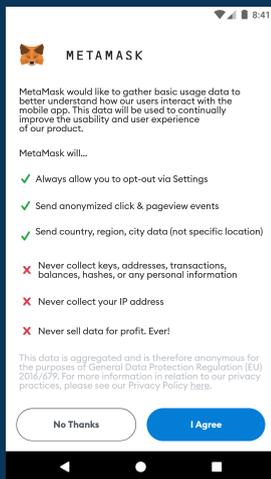

1. On the Welcome to MetaMask screen, tap the Get Started button

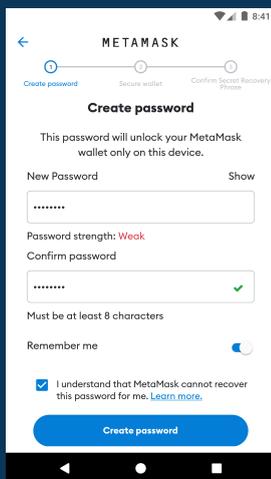

2. On the Wallet setup screen, tap the Create a new wallet button

3. On the next screen, tap the I Agree button

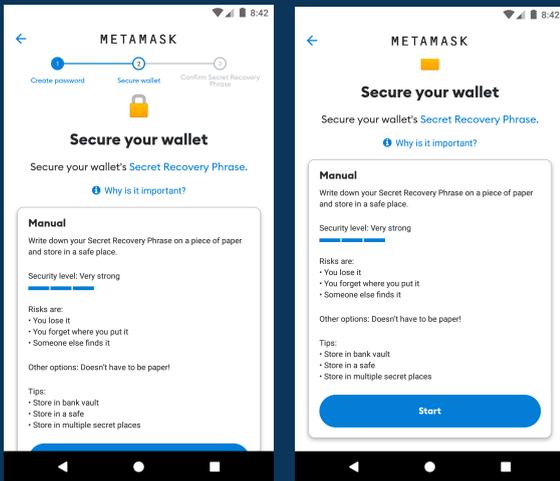

4. You must protect your wallet with a password. Enter one that you WILL NOT FORGET... AND RECORD IT SAFELY!

5. You can optionally toggle the Remember me switch on
6. Check the "I understand that MetaMask cannot recover this password for me." checkbox
7. Tap the Create password button
8. Your wallet has a secret recovery phrase that you must NEVER share with anyone. Click the Start button to begin getting your SECRET RECOVERY PHRASE.

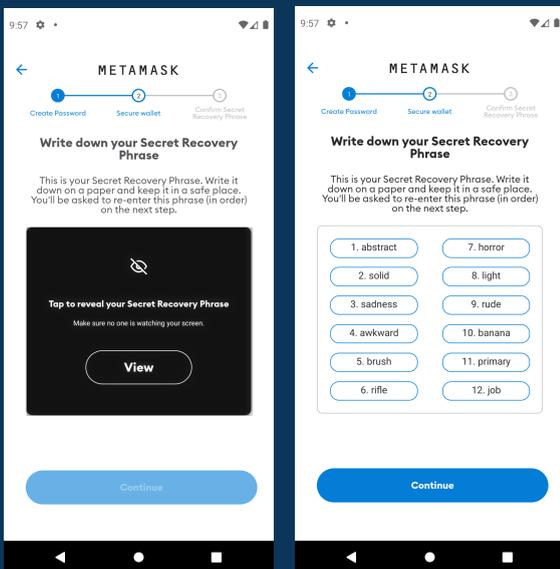

9. Read the Secure your wallet screen to understand the importance of your secret recovery phrase

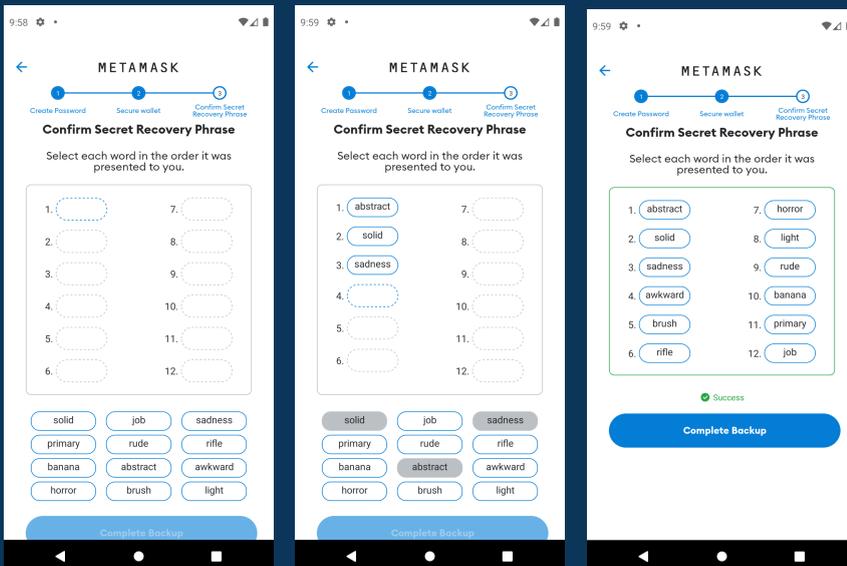

10. Click the Start button to continue

11. Make certain that nobody is watching over your shoulder, then tap the View button to reveal your 12 secret recovery phrase words.

12. Write them down on PAPER and store them in a safe place. If you lose this you will not be able to recover your wallet and all your funds in your wallet and in Soccerverse will be PERMANENTLY lost.

13. On the Confirm Secret Recovery Phrase screen, tap each of the words in order

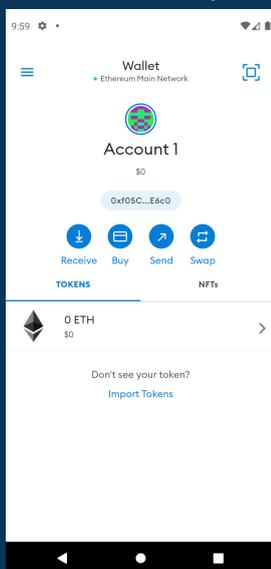

14. Tap the Complete Backup button to continue

15. CONGRATULATIONS! YOU'VE SET UP METAMASK PERFECTLY! Tap the Done button

16. You're now ready to add Polygon and get some MATIC and WCHI

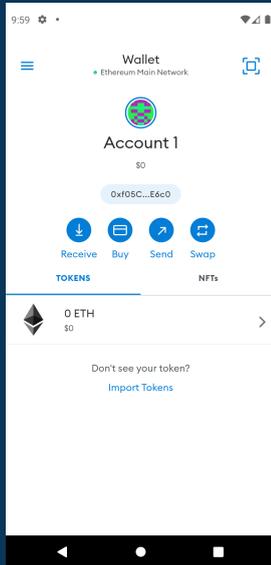

Add the Polygon Network

Adding the Polygon Network in the MetaMask mobile app is trivial.

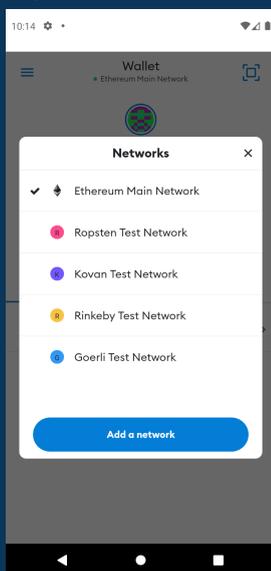

SOCCERVERSE

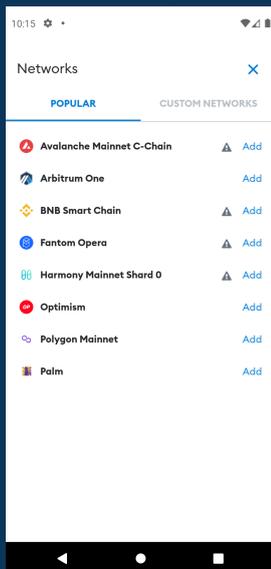

1. On the main screen, tap the top where it says "Wallet" and "Ethereum Main Network"

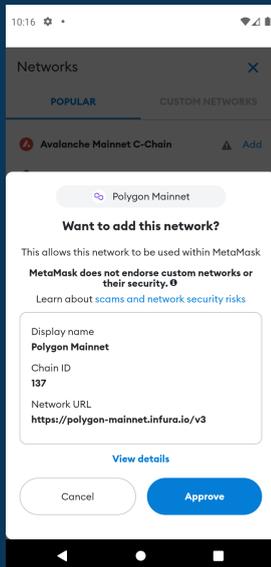

2. Tap the Add a network button

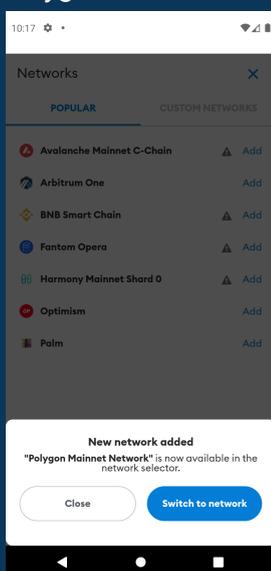

3. Look for "Polygon Mainnet" in the list, then tap the Add link beside it on the right

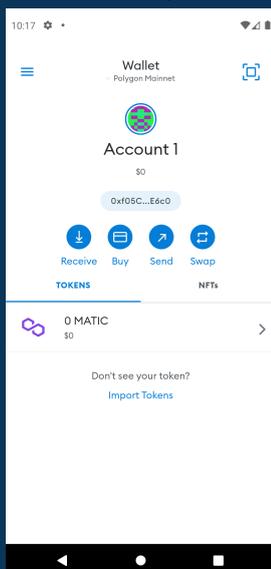

4. In the “Want to add this network?” popup, tap the Approve button

5. Polygon is now added. Tap the Switch to network button to switch to Polygon

6. Check the top of the screen. You should see “Polygon Mainnet” there.

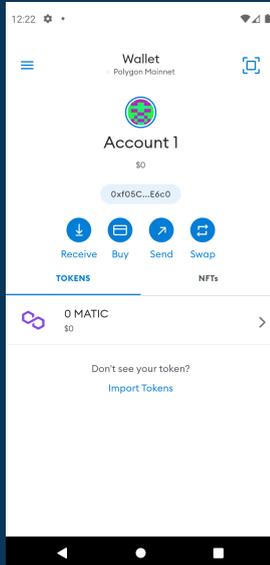

7. Check down the screen under the Tokens tab. You should see 0 MATIC.
8. Congrats! You’ve added Polygon! Time to get some MATIC and WCHI!

Get Some MATIC

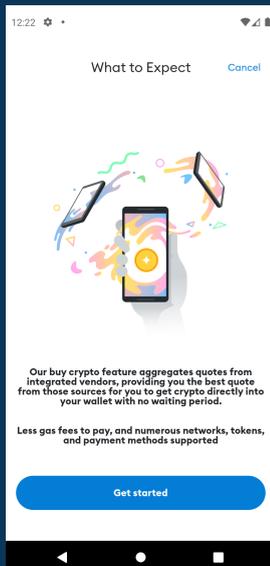

There are far too many different ways to get MATIC, so only 1 way is described below. For help with other ways, search online or ask in our [Discord server](#).

The simplest way to get MATIC is through the MetaMask wallet using a credit/debit card. To do that:

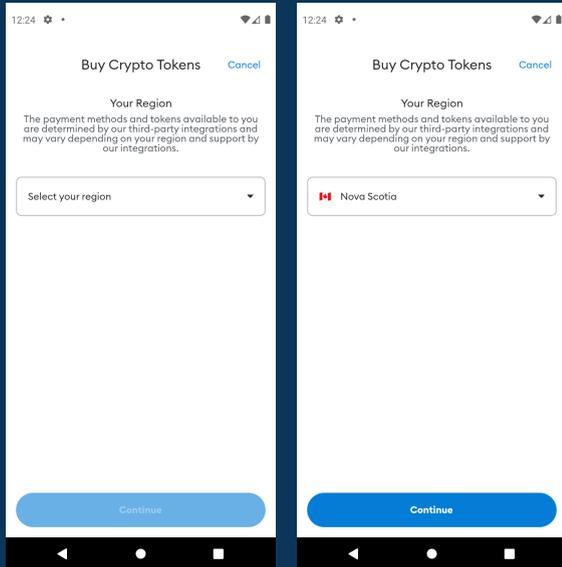

1. On the main screen, tap the Buy icon in the middle of the screen

2. Read the "What to Expect" screen then tap the Get started button

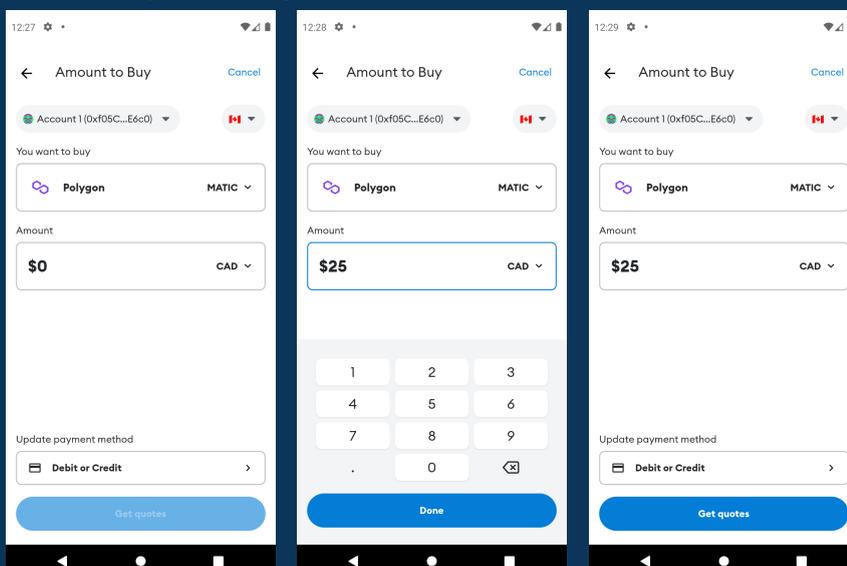

3. On the Buy Crypto Tokens screen, select your region, i.e. country, etc., then tap Continue

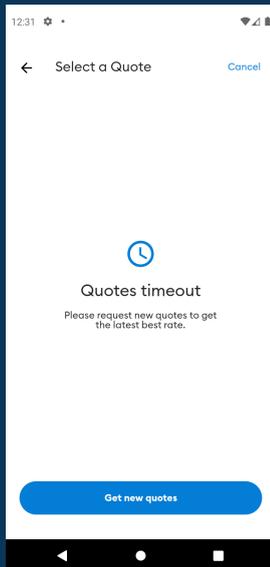

4. You may have more than 1 payment method available to you on the Payment Method screen, depending on your region. Choose one if you have the option. Tap the Continue to account button.

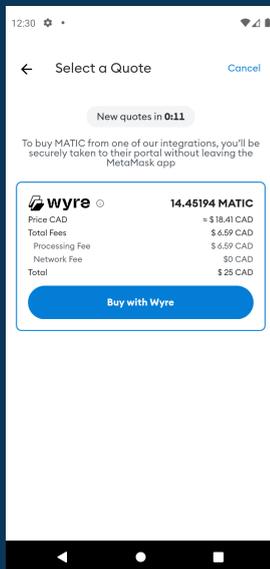

5. On the Amount to Buy screen, make sure that MATIC is selected, and enter the amount that you wish to spend in your local currency, e.g. GBP, CAD, USD, EUR, KRW, CNY, etc., then tap the Done button and then tap the Get quotes button

6. Quotes are dynamic and change very quickly. If you wait too long, you'll need to tap the Get new quotes button

7. Tap the "Buy with XXXX" button

8. Follow the instructions as you would with any regular online purchase. Your MATIC will be sent to you after you've completed the transaction

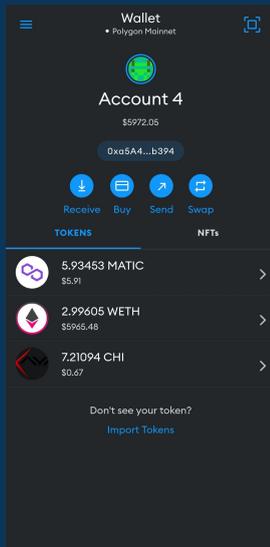

You may need to wait a few minutes. Just be patient. Your MATIC will be sent to your wallet. Usually this is very quick.

Next, you can use some MATIC to buy WCHI. Just make sure you keep some MATIC for blockchain transaction fees.

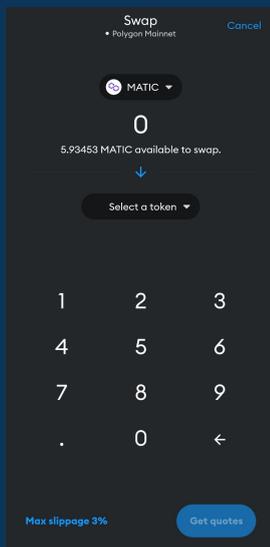

Get Some WCHI

To get some WCHI, you can swap some of the MATIC you purchased for WCHI (or CHI).

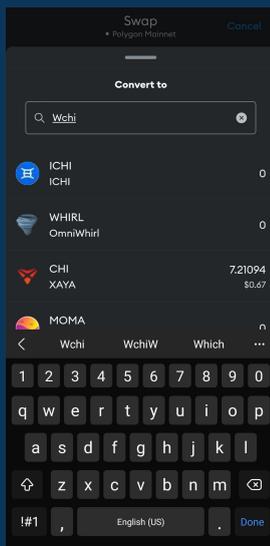

1. On your MetaMask main screen, tap the Swap button

2. On the Swap screen, tap the Select a token drop down menu

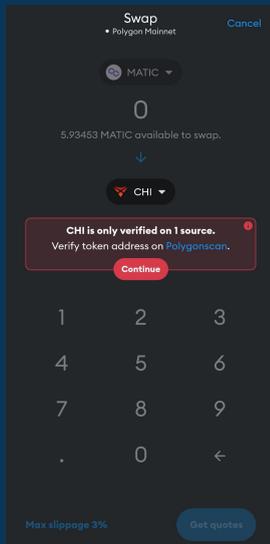

3. In the Convert to field, type "CHI" or "WCHI"

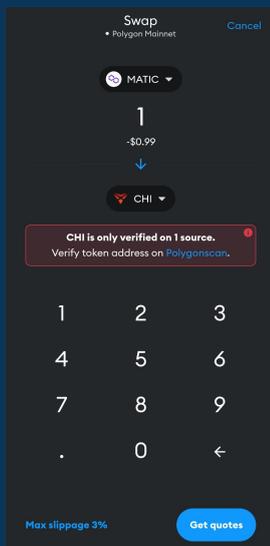

4. In the results list, tap the XAYA CHI result

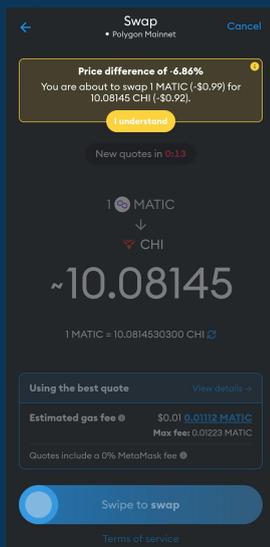

5. Tap the Continue button

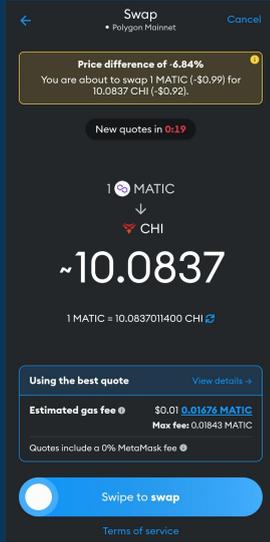

6. Enter an amount of MATIC to spend on WCHI

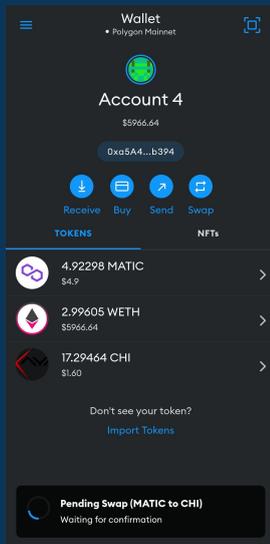

7. Tap the I understand button

8. Confirm your decision by swiping the Swipe to swap bar

9. Wait a few moments and your WCHI will arrive in your MetaMask wallet

10. Go and play Soccerverse!
